

Arch. Dipl.-Ing Dr.techn Martin Emmerer

Martin Emmerer is an architect and founding member of the architecture collective Hope of Glory. The new southern wing of the castle museum in Linz can be named one of his most important realized projects. His passion for architecture is attended by his expertise in computer-science and programming, which led him to the development of Archilles Pro, a smart design tool for architects. Martin Emmerer holds a doctorate degree in CAAD, he is visiting lecturer and guest critic at different Universities.
